Course of Fire:

Standard NRA Prone Slow Fire. All shooting will be conducted at 600 yds. Match may be conducted with two or more relays depending on number of shooters present and at the match director's discretion. Fullbore matches will be shot two-to-a-mound (pair-fire) whenever possible, but may have one or more targets shooting either three-to-a-mound or string-fire to make the squadding work.

Conventional Prone (string fire) events:

5 minute block time for unlimited sighters / blow-off, after which targets will be cleared.
22 minute block for 2 sighters and 20 record shots.
22 minute block for 2 sighters plus 20 record shots.
22 minute block for 2 sighters plus 20 record shots.

Fullbore (pair fire) events:

5 minute block time for unlimited sighters / blow-off, after which targets will be cleared.
2 convertible sighters and 15 record shots, 45 seconds allowed per shot.
2 convertible sighters and 15 record shots, 45 seconds allowed per shot.
2 convertible sighters and 15 record shots, 45 seconds allowed per shot.
(optionally) One additional match of 2 + 15

Awards:

Awards will be broken out by Category (i.e. Prone or F-Class) first, then by sub-category (i.e. F-Open vs. F/TR or Match vs. Service Rifle), then by classification, provided there are enough competitors. There must be at least two competitors in any given category or class to break out awards for that class. If there are not enough of a given group to make a separate category or class, competitors shall be combined as deemed appropriate by the Match Director.

Notes:

Competitors are responsible for being reasonably familiar with the rules and procedures applicable to the match. If you are a new shooter or otherwise need help please contact the Match Director in advance so that you can receive the assistance you need. If you have not shot at 600 yds before, let the Match Director know so they can arrange for help/coaching to get you on target during your unlimited sighter period. A solid zero for your gun/load at 100, 200, or 300 yds will greatly aid the process.

Eye and ear protection are required anywhere in the vicinity of the line or the pits while firing is in progress. Empty Chamber Indicators (ECI) are required any time the gun is out of the case and the shooter is not in their designated preparation period or firing the match.
